

Bug Report — Open Bugs

redmineflux_devops — rfd-125 Centralized Audit Log (Suite 16)

Date: 2026-06-03 Plugin: Release 6.0.0 (version 2033) Environment: Local Docker (localhost:3008)

Open Bugs: 3

Summary

Bug ID	Title	Severity	Status	TC
BUG-RDV-087	DevOps Audit Log admin menu link has no visible text — page undiscoverable	High	OPEN	TC-RDV-576
BUG-RDV-088	Build trigger action not logged — builds controller missing Auditable concern	High	OPEN	TC-RDV-578
BUG-RDV-089	Audit log viewer ignores per_page URL parameter — page size fixed at 50	Low	OPEN	TC-RDV-593

BUG-RDV-087

HIGH

DevOps Audit Log admin menu link has no visible text — page is undiscoverable via UI

REDMINE VERSION
6.0.0

ENVIRONMENT
Local Docker (localhost:3008)

DATE
2026-06-03

PLUGIN
redmineflux_devops

USER ROLE
Administrator

TC REFERENCE
TC-RDV-576

STEPS TO REPRODUCE

- Log in as admin
- Navigate to Administration (/admin)
- Inspect the admin sidebar menu

EXPECTED RESULT

- A labelled "DevOps Audit Log" link should appear in the Administration sidebar allowing admins to navigate to `/admin/devops_audit`

ACTUAL RESULT

- No "DevOps Audit Log" link is visible in the admin sidebar
- An invisible blank `<a href="/admin/devops_audit#"></a>` exists — injected by the plugin but has no text, no icon, ends with `#`
- The page is only reachable by typing the URL directly: `/admin/devops_audit`

SCREENSHOT EVIDENCE

The screenshot shows the Redmine Admin interface. The top navigation bar includes links for Home, My page, Projects, Administration, and Help. The main content area displays the "DevOps Audit Log" page, which includes a table of audit events. The sidebar on the right, under the "Administration" section, lists standard Redmine admin items: Projects, Users, Groups, Roles and permissions, Trackers, Issue statuses, Workflow, Custom fields, Enumerations, Settings, LDAP authentication, Applications, Plugins, and Information. Notably, there is no link for the DevOps Audit Log in this sidebar.

Admin panel (/admin) — no DevOps Audit Log link in sidebar. Standard Redmine admin items only.

Build trigger action not logged in audit log — builds controller missing Auditable concern

REDMINE VERSION
6.0.0

ENVIRONMENT
Local Docker (localhost:3008)

DATE
2026-06-03

PLUGIN
redmineflux_devops

USER ROLE
Administrator

TC REFERENCE
TC-RDV-578

STEPS TO REPRODUCE

1. Log in as a user with `trigger_builds` permission
2. Navigate to a project DevOps > Builds and trigger a build
3. Log in as admin and navigate to `/admin/devops_audit`
4. Check the `audit_action` dropdown for a build-related action type

EXPECTED RESULT

- A `build.trigger` audit entry is created when a build is triggered
- rfd-125: "every privileged DevOps action records an audit row" — build triggering is privileged

ACTUAL RESULT

- No `build.trigger` action type in the `audit_action` dropdown
- Builds controller is not instrumented with the `Auditable` concern
- 12 other action types log correctly: `branch.create`, `deployment.approve`, `env_request.create`, `environment.*`, `freeze.*`, `release.create`

49 events								
(1-49/49) Per page: 25, 50								

audit_action dropdown — 13 action types shown, none related to build triggers.

Audit log viewer ignores per_page URL parameter — page size fixed at 50

REDMINE VERSION	PLUGIN
6.0.0	redmineflux_devops
ENVIRONMENT	USER ROLE
Local Docker (localhost:3008)	Administrator
DATE	TC REFERENCE
2026-06-03	TC-RDV-593

STEPS TO REPRODUCE

1. Log in as admin and navigate to `/admin/devops_audit`
2. Observe the "Per page: 25, 50" options in the pagination bar
3. Click the "25" per-page link (navigates to `?per_page=25`)
4. Observe the page result

EXPECTED RESULT

- Navigating to `?per_page=25` should show 25 events per page with page navigation

ACTUAL RESULT

- All 49 events shown on a single page — `per_page` URL parameter is ignored
- Pagination HTML shows `<span class="selected">50</span>` confirming page size stays at 50
- Multi-page navigation cannot be tested with current dataset
