

# redmineflux\_devops — Bug Report

Suite 06 — Test Results & Quality | 2 open bugs | Redmine 6.0.9 | Generated 2026-05-28

Plugin: redmineflux\_devops | Environment: Local Docker (http://localhost:3008) | Status: Open

|                    |                                                                                                                                                        |                                                                            |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| BUG-RDV-047        | High                                                                                                                                                   | Test duration monitoring REST endpoint returns 404 — route not implemented |
| Steps to Reproduce | 1. Authenticate with a valid admin API key.<br>2. Send GET /projects/phoenix-platform/devops/test_duration_stats.json<br>3. Observe the HTTP response. |                                                                            |
| Expected Result    | HTTP 200 with JSON body containing suite duration trend data and slowest-N test list.                                                                  |                                                                            |
| Actual Result      | HTTP 404 "Page not found" for all URL patterns. Route entirely absent from plugin routing table.                                                       |                                                                            |
| Affected TCs       | TC-RDV-273 (BLOCKED), TC-RDV-274 (BLOCKED), TC-RDV-275 (FAIL), TC-RDV-285 (FAIL)                                                                       |                                                                            |

|                    |                                                                                                                                                                                                                   |                                                                                             |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| BUG-RDV-048        | High                                                                                                                                                                                                              | Test coverage tracking feature not implemented — no coverage page, webhook, or trend widget |
| Steps to Reproduce | 1. POST /devops/webhook/codecov/phoenix-platform with {"coverage":81.5,"build_id":1}<br>2. Navigate to /projects/phoenix-platform/devops/coverage<br>3. Check GET /projects/phoenix-platform/devops/coverage.json |                                                                                             |
| Expected Result    | Codecov webhook accepted (HTTP 202). Coverage page shows %, trend arrow, sparkline. Empty state: "No coverage data available".                                                                                    |                                                                                             |
| Actual Result      | POST → HTTP 404 {"error":"provider not found"}. All coverage URL patterns return 404. No Coverage tab in DevOps nav. Feature entirely absent.                                                                     |                                                                                             |
| Affected TCs       | TC-RDV-262 (BLOCKED), TC-RDV-263 (FAIL), TC-RDV-279 (BLOCKED), TC-RDV-287 (BLOCKED)                                                                                                                               |                                                                                             |
