

redmineflux_devops — Bug Report

Suite 07 — DORA & Flow Metrics | 3 open bugs | Redmine 6.0.9 | Generated 2026-05-28

Plugin: **redmineflux_devops** | Environment: Local Docker (http://localhost:3008) | Status: **Open**

BUG-RDV-049	Medium	DORA metric cards show "0" instead of "N/A" when no deployment or incident data exists
Steps to Reproduce	1. Navigate to project with zero deployments and zero incidents (/projects/orion-api/devops_metrics). 2. Observe all four DORA metric cards.	
Expected Result	All four DORA cards display "N/A" or "No data". No classification badge shown when metric cannot be calculated.	
Actual Result	Cards show "0.0", "0%", or "0" with active badges. MTTR shows "elite" with 0 incidents (misleading). No N/A or guidance message.	
Affected TCs	TC-RDV-302 (FAIL), TC-RDV-323 (FAIL)	

BUG-RDV-050	High	QA Engineer role can access DORA Metrics page — RBAC not enforced
Steps to Reproduce	1. Log in as qa_user (QA Engineer role). 2. Navigate to /projects/phoenix-platform/devops_metrics.	
Expected Result	QA role lacks "View DORA Metrics" permission. Page returns HTTP 403.	
Actual Result	DORA Metrics page returns HTTP 200 for qa_user. All metric cards fully visible. Single view_devops check used — no separate DORA metrics permission enforced.	
Affected TCs	TC-RDV-318 (FAIL)	

BUG-RDV-051	Medium	Dashboard shared flag update returns HTTP 200 instead of 403 when user lacks manage_devops_settings
Steps to Reproduce	1. Log in as dev_user (Developer — no manage_devops_settings). 2. Create dashboard (ID 2). 3. PATCH /projects/phoenix-platform/devops/dashboards/2 with shared=1.	
Expected Result	Server returns HTTP 403 Forbidden. Shared flag remains false.	
Actual Result	PATCH returns HTTP 200. Shared flag silently ignored and not saved. Should be 403 for unauthorized bypass.	
Affected TCs	TC-RDV-316 (FAIL)
