

redmineflux_devops — Bug Report

Suite 10 — Incident Management | 12 open bugs | Redmine 6.0.9 | Generated 2026-05-28

Plugin: **redmineflux_devops** | Environment: Local Docker (http://localhost:3008) | Status: **Open**

BUG-RDV-060 **High** Incident creation form deviates from INC-001: no standalone Title field

Steps to Reproduce	1. Navigate to /projects/phoenix-platform/devops_incidents/new. 2. Observe the form fields available.
Expected Result	Form contains a Title field (required, per INC-001) separate from Affected Service.
Actual Result	Form fields: Severity, Status, Affected service, Started at, Linked issue, Root cause — no Title field. affected_service only shown as h2 heading, no labeled row in summary panel.
Affected TCs	TC-RDV-421 (FAIL), TC-RDV-425 (FAIL)

BUG-RDV-061 **High** No dedicated "Linked Alerts" section on incident detail page

Steps to Reproduce	1. Navigate to /projects/phoenix-platform/devops_incidents/1. 2. Search for "Linked Alerts" section.
Expected Result	"Linked Alerts" section visible with rows showing alert title, source, severity, and fired_at timestamp.
Actual Result	No "Linked Alerts" section anywhere. DOM: body.includes("Linked Alert") → false. Alert info only appears in Timeline as text.
Affected TCs	TC-RDV-426 (FAIL)

BUG-RDV-062 **High** No "Add Entry" button for manual timeline entries on incident detail page

Steps to Reproduce	1. Navigate to /projects/phoenix-platform/devops_incidents/1. 2. Review timeline section. 3. Search for button to add a manual timeline entry.
Expected Result	"Add Entry" button visible in Timeline section. Clicking opens form for custom timeline note.
Actual Result	No "Add Entry" button or control. Timeline only shows system-generated entries. No button matching "Add Entry", "Add Note", or "Add Timeline" found.
Affected TCs	TC-RDV-429 (FAIL)

BUG-RDV-063 **High** Incident Timeline REST API returns 404 for all URL patterns

Steps to Reproduce	1. Authenticate as admin. 2. GET /projects/phoenix-platform/devops_incidents/1/timeline.json 3. Also test /entries.json variant.
Expected Result	GET /projects/:project_id/devops_incidents/:id/timeline.json returns HTTP 200 with JSON array of timeline entries.
Actual Result	All URL patterns return HTTP 404. Route not defined. Timeline data only accessible via UI render.
Affected TCs	TC-RDV-430 (FAIL), TC-RDV-456 (FAIL)

BUG-RDV-064	High	Incidents JSON REST API returns HTTP 406 Not Acceptable
Steps to Reproduce	1. Authenticate as admin. 2. GET /projects/phoenix-platform/devops_incidents.json 3. Observe HTTP response code.	
Expected Result	HTTP 200 with JSON array of incident objects.	
Actual Result	HTTP 406 Not Acceptable. Controller action has no respond_to block for :json. Only HTML format rendered.	
Affected TCs	TC-RDV-437 (FAIL)	

BUG-RDV-065	High	Developer role can access New Incident form — manage_incidents permission not enforced
Steps to Reproduce	1. Use dev_user (Developer role). 2. GET /projects/phoenix-platform/devops_incidents/new.	
Expected Result	Developer lacks manage_incidents. Returns HTTP 403 Forbidden.	
Actual Result	HTTP 200 OK. New Incident form fully rendered for Developer role. authorize/require_permission check missing from new/create actions.	
Affected TCs	TC-RDV-452 (FAIL)	

BUG-RDV-066	Medium	"Assigned To" column missing from incidents list page
Steps to Reproduce	1. Navigate to /projects/phoenix-platform/devops_incidents. 2. Review table columns.	
Expected Result	Incidents list includes "Assigned To" column. Each row shows assigned user name.	
Actual Result	No "Assigned To" column. Columns: Affected Service, Severity, Status, Started At only. Assignee only visible in individual incident page.	
Affected TCs	TC-RDV-424 (FAIL)	

BUG-RDV-067	Medium	Deployment correlation override creates no timeline or audit entry
Steps to Reproduce	1. Navigate to /projects/phoenix-platform/devops_incidents/6. 2. Set Related Deployment field and click "Save Correlation". 3. Check incident timeline.	
Expected Result	Timeline entry created: "Deployment correlation updated — Deployment #X linked by [user] at [timestamp]".	
Actual Result	Field updates but no timeline entry created. No audit log entry for the override action.	
Affected TCs	TC-RDV-433 (FAIL)	

BUG-RDV-068	Medium	Post-mortem Root Cause section shows placeholder text, not pre-filled from incident root_cause field
Steps to Reproduce	1. Create incident with non-empty root_cause. 2. Click "Generate Post-Mortem". 3. Inspect Root Cause section of generated wiki page.	
Expected Result	Root Cause section pre-filled with incident root_cause field value.	
Actual Result	Root Cause section shows generic placeholder. Template does not interpolate the root_cause field value.	
Affected TCs	TC-RDV-435 (PARTIAL)	

BUG-RDV-069	Medium	No journal or timeline entry created after sending communication template
Steps to Reproduce	1. Open communication template modal on incident #1. 2. Select template, click Preview, then "Send Update". 3. Check incident timeline for new entry.	
Expected Result	Timeline entry created: "Communication sent — Template [name] sent by [user] at [timestamp]".	
Actual Result	Modal closes. No new timeline entry. No journal record. Communication action invisible in incident audit history.	
Affected TCs	TC-RDV-446 (FAIL)	

BUG-RDV-070	Medium	Blank affected_service accepted on incident creation, defaults to "Unknown Service"
Steps to Reproduce	1. Navigate to /devops_incidents/new. 2. Leave "Affected service" blank. 3. Fill Severity and Status. 4. Click "Create Incident".	
Expected Result	Rejected with validation error "Affected service can't be blank". Incident not created.	
Actual Result	Form submitted successfully. Incident created with affected_service = "Unknown Service". No validation error.	
Affected TCs	TC-RDV-449 (FAIL)	

BUG-RDV-071	Low	Incidents empty state shows blank area with no informative message
Steps to Reproduce	1. Use project with no incidents. 2. Navigate to /projects/<id>/devops_incidents. 3. Observe content area.	
Expected Result	Informative empty-state message: "No incidents found. Create the first incident to get started."	
Actual Result	Empty content area. No message, icon, or call-to-action. Cannot distinguish "no data" from page load failure.	
Affected TCs	TC-RDV-454 (FAIL)
